

KIWI FENCE

**Lockable Two-Way
Gate Latch**
Item GLJR

- For use on gates with 1¹/₄" - 1¹/₂" O.D. round tube
- One-handed operation
- Can be padlocked for additional security
- Latch will release to allow gate to swing either direction
- Prevents gate end from sagging or swinging
- Can be opened from horseback

Mounting Instructions

- Allow 1¹/₂"-2¹/₈" gap between post and gate by adjusting gate hinge or hinge bolts.
- Bolt the latch pin onto the gate slightly above the center. To avoid any possibility of latch pin twisting on gate, put one bolt above and one bolt below a horizontal tube on gate.
- With the gate in the closed position, mount latch securely to post, using the latch pin as a gauge for correct height.
- Final adjustments can be made by sliding latch pin and/ or adjusting gate hinges up and down.
