

**Lockable Two-Way
Gate Latch**
Item GLL

- For use on residential, commercial or livestock gates with 1^{3/8}" - 2" O.D. round tube
- Latch will release to allow gate to swing in either direction
- One-handed operation
- Prevents gate end from sagging or swinging
- Can be opened from horseback
- Can be padlocked for additional security

Mounting Instructions

- Allow 2"-2^{3/4}" gap between post and gate by adjusting gate hinge or hinge bolts.
- Select the model number of the Sure Latch™ set that matches the diameter of your gate tubing.
- For use on 1^{3/8}" or 2" O.D. round tube gate, remove the inner shim from the latch pin.
- Bolt the latch pin onto the gate slightly above the center. To avoid any possibility of latch pin twisting on gate, put one bolt above and one bolt below a horizontal tube on gate.
- With the gate in the closed position, mount latch securely to post, using the latch pin as a gauge for correct height.
- Final adjustments can be made by sliding latch pin and/ or adjusting gate hinges up and down.
- Please note: Hardware to mount latch to gate is included. Post mounting hardware is NOT included
