

Kiwi Gate Anchor (GLA) Mounting Instructions

- Use the U-bolts enclosed in the package for round tube gates from 1 5/8" to 2" diameter.
- Bolt the gate anchor toward the bottom of the gate, opposite the hinged end.
- Push down on the handle to hold the gate in position. To release, hold the tab down above the spring while lifting on the handle.
- Bolt the latch pin onto the gate slightly above the center. To avoid any possibility of latch pin twisting on gate, put one bolt above and one below a horizontal tube on gate.
