

OPERATING INSTRUCTIONS

Straining

- 1) Attach strainer hook to one clamp and chain hook on opposite clamp.
- 2) Insert chain into strainer grab.
- 3) Operate handle until desired tension is reached.

Removing the Strainer

- 1) Apply pressure on handle to release lead grab. Lift the lead grab while reducing pressure on handle and guide the grab to previous link.
- 2) Support the chain behind the grabs. Ensure chain does not twist during release.

Capacity

Deer Fence: Use 3 strainers.

Field fence: Use 2 strainers.

Recommended fence length: 660 ft.

Working load: 1300lb (**do not exceed**).
