

H-Post Kit

- Simple kit to use when bracing any type of H-Post for additional support.
- Suitable to carry loads less than or equal to 2750 lbs.

FEATURES AND BENEFITS

- Fast and simple assembly.
- Flexible wire rope for maximum manoeuvrability.
- No bending, twisting or tensioning of individual stay wires.
- Minimal risk of injury.
- Can be tensioned and re-tensioned.

INSTALLATION

The following instructions refer to the diagrams

- 1) Secure the wire rope around the post with a single loop below the staple.
- 2) Feed the wire rope through the pre-ferruled loop.
- 3) Feed the end of the wire rope through the Grippler, and around the brace post and back through the second channel of the Grippler.
- 4) The wire rope can be quickly and easily tensioned using the Grippler Tensioning Tool.
- 5) With the installation complete, the H-Post Kit is expected to carry loads up to 2750 lbs.
